SUMMARY

Computer Science undergraduate at Amrita Vishwa Vidyapeetham, Chennai (CGPA 8.08/10) with a strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, and Computer Networks — built on C, C++, and Java. Experienced in designing and building efficient, testable systems across the full development lifecycle, from backend and ML/RAG pipelines (Python, FastAPI, SQL) to front-end integration (React). 105+ problems solved on LeetCode; HackerRank SQL (Advanced) certified.

TECHNICAL SKILLS

Languages: C, C++, Java, Python, SQL, JavaScript

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Computer Architecture, System Design Fundamentals

Backend: FastAPI, REST APIs, PostgreSQL, MySQL, RDBMS, React (front-end integration)

AI / ML: RAG, LLM Integration, OpenAI API, Computer Vision, Recommendation Systems

Tools: Git, GitHub, Linux, Bash

EXPERIENCE

PR Lead — AMCFOSS, Amrita Vishwa Vidyapeetham

Chennai, India | Jan 2026 – Present

- Lead structured industry and sponsorship outreach for AMCFOSS, researching organizations, identifying decision-makers, and managing a tracker across event, prize, and technical-collaboration sponsorships.
- Represent the club in external communication to build partnerships and mentorship/internship pipelines; drive member onboarding and cross-team collaboration for workshops and hackathons.

PROJECTS

RagForge — Production-Grade RAG Pipeline

Python, Hybrid Retrieval, Cross-Encoder Reranking, Adaptive Routing

- Built a production-grade RAG pipeline combining hybrid retrieval with cross-encoder reranking for improved answer relevance.
- Implemented adaptive query routing, hierarchical summarization, and a statistical evaluation framework to measure retrieval and answer quality.

GitHub: github.com/Kavin-JS/RagForge

AIKA — AI Knowledge System

JavaScript, Task Automation, Reasoning, Human-AI Interaction

- Built a modular AI assistant for knowledge management, combining task-automation and reasoning components with a human-AI interaction layer.
- Designed the system architecture to support extensible, pluggable knowledge-management workflows.

GitHub: github.com/Kavin-JS/AIKA

StyleMind AI — AI-Powered Personal Styling Platform

In Dev

FastAPI, React, PostgreSQL, Computer Vision, LLM Integration

- Building the next-generation version of ShonoWear — a full-stack AI styling platform with a PostgreSQL-backed virtual wardrobe, pretrained computer-vision models for clothing analysis, and an LLM-based chat interface for outfit recommendations.

GitHub (previous version): github.com/Kavin-JS/Shonowear-Ver4.0

Voice Wake-Word Detection System

Python, Vosk, SoundDevice, Real-Time Audio Processing

- Built an offline, real-time voice wake-word detection system using Vosk for speech recognition and SoundDevice for audio capture, with a live dashboard tracking detection confidence and hit/miss statistics.

GitHub: github.com/Kavin-JS/Voice-Wake-Word-System

EDUCATION

B.Tech, Computer Science & Engineering — Amrita Vishwa Vidyapeetham, Chennai

Aug 2024 – Present

CGPA: 8.08/10

Relevant coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Computer Architecture, Object-Oriented Programming

Class XII & X (CBSE) — Acharya Siksha Mandir, Pondicherry

2020 – 2024 | 75%

CERTIFICATIONS & ACHIEVEMENTS

HackerRank — SQL (Advanced, Intermediate, Basic), Python (Basic) • DBMS Certificate — Amrita Vishwa Vidyapeetham • Networking Basics — Cisco Networking Academy • UNIX & Linux OS Fundamentals • IBM SkillsBuild — Generative AI in Action • Prompt Engineering — SkillCraft Technology (certificate course) • 105+ problems solved on LeetCode.
